Title: Refrigeration Engineering

Author: Sheng Ching-ch'ao (盛 敬超)

Publisher: Chung-kuo K'o-hsueh T'u-shu I-ch'i Kung-ssu, Shanghai, Jun 1952

Sponsor or

Issuing Authority: None indicated

No Pages: 243

Language: Chinese

Area of Coverage: China

Subjects Covered: Refrigeration engineering; refrigeration systems

Review: College level textbook for engineering students containing 14 chapters covering the general principles of refrigeration, refrigeration systems, refrigerants, simple diagrams of refrigeration units, and various calculations used in refrigeration engineering. Bibliography lists 26 technical publications and a handbook of which 20 are by Americans and the rest by Germans, Russians, and Chinese. Gives information on two of the major refrigeration and ice storage companies in Shanghai.
